## Pre-Nuptial Shower

In compliment to Miss Blanche Schooley, whose marriage will take place early in August, Miss Rheta Campbell entertained at a miscellaneous shower on Friday afternoon. A miniature bride and groom centered the attractively decorated tea table. The feature of the afternoon was the presenting of the gifts. During the recital of a story, by the hostess, a little fairy (Mavis Moffatt) fitted in and conducted the bride-to-be to a secret chamber where a wee bride presided over the many gifts. The bride-to-be then returned to hear the finish of the narrative to learn that the couple lived happily ever after. The invited guests were: Misses Aileen McCullough, Ada Williamson, Gertrude Granlin, Jean McEwen, Helen Bozarth, Edna Steddard, Kate Pharis, Aileen Collins, Ruth Anderson, Gladys Anderson, Helen and Geraldine Farmer, Elsie Mann, Esther Lomheim, Marjorie Ferguson, Marguerite Vanbosien, Ivah Miller, Walberg Ulfsten, Letha Hopkins, Marjorie Hopkins, Myrtle Hopkins, Florence Ulrich, Margaret Patterson, Barbara Wise, Phyllis Baslin.

It would be foolish to attempt to minimize the damage to crops of all kinds by the prolonged spell of hot, dry weather. That the grain survived as well as it did is more or less a miracle, when the absence of sub-surface moisture is taken into account.

## In Memoriam

In loving memory of Alphonse Burgess Caldwell, who passed away July 17, 1931.  
What would we give to clasp his hand,  
His happy face to see,  
To hear his voice, and see his smile  
That means so much to us.  
Inserted by Mrs. A. B. Caldwell,  
Frank and family.

What promised to be a real rain on Wednesday turned out to be a dust storm, accompanied by a light shower. Heavy showers fell to the south. Summer-fallow crops are holding up well but stubble crops have suffered severely. Rain within the next week will aid considerably. Hoppers have reached the flying stage but are not appearing in alarming numbers.

Word was received in town of the arrival of Mr. and Mrs. R. Tyler in Calgary. They were seven days enroute from England.

Mrs. C. Lucia was a Calgary visitor this week.

Mrs. Bobbie of Spirit River was the house guest of Mrs. F. Clever last week.

Mr. and Mrs. Manhard leave Friday to spend their holiday at Blackfalds, Alberta. Now, will it rain?

C. Versluys has located at Millet, Alberta, having bought a C.P.R. farm at that point.

Sunday, July 23

Champion United Church  
Rev. Peter Dawson, Minister  
Pianist Miss Rheta Campbell  
Mission Morning Worship, 11:30 a.m.  
Champion Sunday School, 11:00 a.m.  
Champion Evening Worship at 7:30  
Subject—"Finding God in our Sphere of Need or in Prayer."  
Come and enjoy the song service.

## Women's Institute

The meeting of the Women's Institute was held at the home of Mrs. Martin Clever on Tuesday the 11th. Owing to the absence of the president and secretary the chair was taken by the vice-president, Mrs. Chamberlain and Mrs. Dean Smith kindly acted as secretary. Arrangements were made for a picnic at Mrs. Martin's and a delegate was elected to attend the Constituency Conference to be held at Vulcan July 20th. The resignation of the president was accepted with regret. A splendid paper was given by Mrs. Dean Smith on Canadianization and Immigration. A well rendered vocal solo by Miss Ada Williamson accompanied by Miss Marjorie McCullough, preceded the delicious refreshments which included home grown strawberries and ice cream served by Mrs. Watkins assisted by Mrs. Clever and Mrs. Ulrich. Everyone had a most enjoyable time.

## Local and General

New prices Canning Compound at the Drug Store.

Billie Bozarth is a Champion visitor this week.

Cleanup of Boys Running Shoes, sizes 11 to 2—50c pair at Campbell's.

The Ladies' Aid will be postponed for the month of July. Commencing again on August 31st.

Swimming at its best. Every accommodation is provided. See H. Smith for particulars.

Campbell's are selling all their ladies Canvas Shoes at \$1.39 pair, regular \$1.75.

Miss Florence Ulrich wishes to thank her friends for the many kindnesses shown her during her recent illness.

Loganberries, Bing Cherries, Raspberries—Right Now at Campbell's.

Miss Ruth Jopling has been a guest at the home of Mr. and Mrs. N. M. St. Peter at Milo during the past week.

Miss Blanche Schooley left this week for Lethbridge where she will visit her father for a few days.

Why not make HIM just ONE Blueberry Pie, or a Gooseberry—25c will do it at Campbell's.

Mr. and Mrs. Clarence Davis, after spending a few days at the stampede, left for Banff, where they will spend a short holiday.

Mr. and Mrs. Gerald Groves of the Peace River country are guests at the home of Mr. and Mrs. L. M. Groves. Mr. and Mrs. Groves traveled in a covered wagon on took approximately four weeks to make the trip.

Lethbridge Fair visitors included: Mr. and Mrs. Bozarth, Miss Helen Bozarth, Mr. and Mrs. J. O. Bell, Mr. and Mrs. J. O. Bell, Mr. and Mrs. J. Doyle, Mr. and Mrs. F. Clever and McEwen.

The Vulcan Citizens Band, under the baton of Bandmaster Weale, played a recent engagement at the Calgary stampede and as usual rendered very fine and fitting music. On Tuesday the band were featured at the Lethbridge Fair. Bandmen Moffatt, Caldwell, McLennan and Hummel of Champion were present on both occasions.

Lovely House Plants, home grown 35c each at Campbell's.

Miss Jean McEwen has accepted a position with Fraser and McRoberts at Pincher Creek and leaves for that point August 1. Miss McEwen has been on the staff of McCullough Bros. for the past year, and during her stay in Champion has made many friends who will regret her departure.

## For Sale!

Carload Bran  
80c per sack

the Municipal office.

C. RHODES, Secretary

## Long Louie Cafe

The Best Place in Town to Eat

With the approach of the busy season  
we are prepared to cater to farmers  
and others with quick courteous service

--- We Appreciate Your Patronage ---

Cigars, Cigarettes, Tobaccos, Soft Drinks, all Kinds of Fruit  
in Season, Ice Cream the Year Round, etc.

## Local & General

Mrs. Gottenberg was a bridge hostess last week when she entertained at two tables of cards.

Douglas St. Peter of Milo is a visitor at the home of Mr. and Mrs. T. R. Jopling.

Miss Bassett of Huxley is a guest at the home of her sister, Mrs. J. Groves.

F. Clever and family expect to leave Friday for a week's vacation to be spent at Waterton Park.

Among campers at Willow Creek this week are: D. Campbell, D. Stephenson, A. Latiff, Max Caldwell, Bob McCullough, G. Smith and Len Pruit.

M. F. Hamilton, accompanied by Mrs. Hargraves and George, left this week for Casper, Wyoming, where they will visit at the home of Mr. and Mrs. R. White.

Mr. and Mrs. A. Bushfield of Calgary were guests at the home of Mr. and Mrs. J. Cook last week.

Miss Kate Pharis is spending a few days visiting relatives at Todd Creek.

Mr. and Mrs. Pellar of Calgary were visitors at the home of Mr. and Mrs. A. Nelson last week.

Mr. and Mrs. Bob Barrager and family left Sunday to spend a holiday in Vancouver.

O. H. Johnson is a business visitor in Glenhead, Trochu and Calgary this week.

C. B. Johnson has accepted the principalship of the Bonford high school. Mr. Johnson is spending his vacation at the coast.

Miss Edna Stoddard of Calgary is a guest at the home of Mr. and Mrs. G. Campbell.

Mr. and Mrs. Alex McDougall were Lethbridge fair visitors.

## Champion Consolidated School District No. 40

### Tenders

Tenders will be received by the undersigned for transportation of pupils for the term beginning Sept. 1, 1933 on the following terms:

Long South West Route \$3.75 per day, Short South West Route \$2.00 per day, S. H. and N. E. Route \$2.50 per day, Short South West Route to include S. W. 1-12-15-21. Successful tenderer to sign Standard Contract and to comply with the general instructions of the Board.

In awarding Contracts, preference will be given to those in arrears of taxes.  
Tenders will be received for 100 tons (more or less) of screened lump coal, to be delivered as required, with certified weights.

Tenders for Van Routes and Seal to be in Secretary's office by 7 p.m. Tuesday, August 8, 1933.

H. COOPER, Secretary.

## For Sale

Cook Stove in good condition.  
Quebec Heater.  
Kitchen Utensils.  
Kitchen Linoleum.  
Apply to Mrs. Sigal at residence in Sub-division.

Miss Ruth Granlin of Vulcan is the guest of Miss Gertrude Granlin this week.

Mr. and Mrs. C. M. Macellus, accompanied by Miss Gladys Brown, were Pincher Creek visitors Monday.

H. Poirier of Calgary was a visitor in Champion Tuesday.

O. Harper, Derald Hummon and Bud Laug spent a week fishing at Waterton Lakes. They report a good catch.

Mr. and Mrs. F. J. Clapp and daughter are holidaying at Waterton.

P. Gatenby and Ray Hummon spent the week and fishing thirty miles west of McLeod. They report fishing good.

## Considering Two Solutions

National Research Council Working On Chilled Protein Problem

The problem of the prevention of vapour condensation on chilled or frozen products, particularly poultry, is engaging the attention of the National Research Council at the request of the Poultry Division of the Dominion Department of Agriculture. So far, their researches have demonstrated that by means of a heating room, condensation can be avoided without an excessive amount of expense or both when it concerns a stationary cold storage plant. When, however, the proposition is to land the chilled product on a wharf from a ship with no cold storage plant nearby from which to secure dry air, the problem becomes either: (1) the maintaining of a room of sufficiently low dew point, efficiently and economically, into which the product would be placed for warming immediately on landing (if it were not going direct to cold storage); or (2) to perform the operation of warming on shipboard just prior to landing. The possibilities of these two solutions are now under consideration.

## Woman Long-Distance Runner

Covered Twenty Six Miles In Little Over Four Hours

In pouring rain and through heavy traffic Miss Violet Piercy, a young London woman, ran from Windsor to Shepherd's Bush (26 miles 385 yards) in four hours, 25 minutes. She would have done better, except that she developed a strained muscle, and her feet slipped so frequently on the wet roadway. In 1926 she ran the same course in three hours, 40 minutes, and she was trying to beat that time. The men's record for the Marathon is two hours, 35 minutes.

Miss Piercy advocates running as the best way to get slim. A slight, high-spirited young woman, she runs in a severely black running costume, claims to be "about the only woman long-distance runner in the country."

## Churchill Port Fees

Regular Traffic Covering Ships and Cargoes

The port of Churchill, Canada's new gateway to Hudson Bay, is gradually taking on the trappings of a multi-raced seaport, and in the current issue of the Canadian Gazette, the Government of the regular tariff of port wardens' fees covering the survey of ships and cargoes.

For the complete inspection of hatches and cargo, inward, the fees range from \$4 for 1,000 tons to \$30 for 5,000 tons and over. Lumber and grain are in a special category in outward cargo. For the former, fees range from \$8 for a survey of 500,000 pounds and less to \$20 for 3,000,000 pound feet will be charged. The fees for grain are \$10 for 1,000 tons and less to \$50 over 5,000 tons.

## Passing Of Famous Author

Anthony Hope, Popular Fiction Writer, Dies In London

Anthony Hope Hawkins, famous under the pen name of Anthony Hope, died in London recently. Sir Anthony Hope Hawkins, born February 9, 1863, in London, was widely known for his romances, among the most popular of which were "The Prisoner of Zenda," "The Port of Hentzau," "Trafalgar of Blant," "Quintana," and "Double Happiness."

The author was knighted in 1918. The novelist was educated at Oxford, and later was called to the bar.

## Has Made a Difference

Family life is less stable on the farm because of modern farm machinery, better roads, widespread use of telephone, automobile and the radio, says Josephine C. Brown in "The Rural Community and Social Case Work." With the extension of the boundaries of community life through these agencies, the family is less the center of activities.

## Shipped As Freight

It cost Worcester County 75 cents freight charges to "ship" Richard Colburn, 30, of Haverhill, by express to the county jail, Colburn, committed from Gardner court on a charge of vagrancy, was brought to the county jail on the rear of a freight truck at the regular rate which would cover a bundle of merchandise of the same weight.

Inda shipped nearly \$2,000,000 worth of goods to the United States in the first half of 1932.

W. N. U. 2003

## BRITAIN'S LATEST INTERCEPTOR BIPLANE AMAZES SPECTATORS

All the new and some of the old airplanes produced in England were shown to prospective buyers from all parts of the world at London, recently. More than 1,200 guests, representatives of 60 countries, accepted the invitation of the Society of British Aircraft Constructors. Here we see the new Hawker "Fury" interceptor fighter biplane, stated by the British Air Ministry to be the fastest military aircraft in the world, which put on a wonderful exhibition of flying. Diving at almost 400 miles an hour the machine straightened out above the heads of the spectators to fly over a straight-away course at nearly 320 miles an hour.

## Tells Nationally By Lips

Campaign Easily Determined By Their Shape Says French Writer

Show me your lips and I'll tell you what you are, says Maurice Dechambre, one of France's most famous writers. Lips tell a terrible tale when they belong to the fair sex and "lip-reading," he advises, is a safe thing for any man to learn. The lips of the average American beauty, finds Monsieur Dechambre, form an almost perfect Cupid's bow. Parisian lips are not generally so perfectly shaped, but perhaps are most agreeable of all, with a delightful curve to the upper one, giving an elegant and spiritual touch to the entire mouth.

Italian lips conform to the ideas of classic beauty, and Spanish ones are distinguished by their extreme mobility.

Scandinavian women have a very thin upper lip and Venetian lips are almost equal with the little ridge beneath the nose slightly marked. Hungarian lips are domelike and show strong will and German ones are thick and velvety. Brazilian beauties have lips strongly accentuated which give an air of authority.

## Traces Organ To Chinese

Woman Finds Instrument Origin Birth To Ancient "Sheng"

Mrs. A. N. Dunlop, wife of a Shanghai American doctor, who has studied have settled over 300 Chinese musical instruments, advances the opinion that the ancient "sheng," the occasional pipe organ of the birth. This instrument is made of small pipes in a gourd, through which the wind is drawn when played by the mouth. According to Mrs. Dunlop, most of the old instruments were merely called "chin," denoting the power of music to restrain the passions, and the music was used chiefly at religious ceremonies.

## Musolini For Plain Living

No Silk Top Hats and Expensive Trappings For Fascist Official

High-hatting is prohibited literally in a code drawn up by Premier Mussolini for observance by Fascist officials. The list of rules, attached to Il Duce's autographed photograph and circulated among the heads of regional organizations, warns them not to appear at official ceremonies with silk top hats; instructs them not to frequent de luxe restaurants and theatres; says they should walk whenever possible; and use inexpensive automobiles or motor-cycles when transportation is necessary.

## Set Machine For Radio

By dropping a coin in the slot of a radio set, you can listen in on a broadcast for 15 minutes from any station. A thorough trial has been made of these radio slot vendors at the Leipzig Fair, since Leipzig is at the geographical centre to Europe, it was found possible to pick up stations from nearly a score of different countries in as many languages.

At the largest curio auction of the year in New York, an autograph of Frederick Wilhelm III. of Prussia brought only \$1. The signature of King George III. brought \$3.

Japan is buying nearly all of Australia's increased wool production this year.

## Suppression Of Warble Flies

Campaign Being Conducted Against Insect Pest To Cattle

In addition to the work being carried out by the Dominion Department of Agriculture in conjunction with the provincial governments in adopting measures of control for the suppression of warble flies two campaigns on a large scale are being prosecuted at the present moment one by the Ontario Government on Manitoulin Island, and the other as a municipal undertaking by the local authorities of Chatham Island on the Ottawa River in Quebec. Warble flies are of two species very widely distributed in many parts of the world, particularly in Europe, North America, and to a less extent in Asia. Where they are abundant they constitute the worst insect pests to cattle and many cases of infestation in man have been recorded. The flies appear in every part of Canada where stock is raised.

## Had Sense Of Humor

London Postmaster Sent Army Post Card To War Office

An amusing story designed to illustrate the senselessness of postoffice methods, was told by Mr. J. J. Simon at the Philatelic Congress in London recently.

A party of thirty or forty soldiers were stranded at Archaige after the war, he said, with jobs awaiting them at home. They had been promised a speedy passage, but after many weeks there was still no sign of a steamer.

Finally they sent an army postcard home, saying they were there. It was addressed simply to "The Mailers, London."

The postoffice wrote on it: "Try the War Office."

"If you do not believe the story," added Mr. Simon, "I have got the postcard."—London News-Chronicle.

A lady driver stopped one day at a garage and said: "I see that you charge batteries here." "Yes, madam."

"Well, I'd like you to put a new one in my car, please, and charge it to my husband."

A barley that is in head 45 days from seeding has been derived from a cross made at Manitoba Agricultural College between O.A.-21 and Liza varieties.

## Rest For Migrating Birds

Perches Erected On Lighthouses By Royal Society

When the feathered "seasonal invasion" of the United Kingdom began and thousands of birds arrived for their annual sojourn—hostels built on lighthouses for migrant birds were packed to capacity nightly by voyagers. These consist of rows of perches above and below the lanterns, and they have been erected on various lighthouses.

Before these resting-places were built thousands of birds perished around the lighthouses and lightships during their passage to the shores around Manchester, England. Attracted at dusk and in bad weather by these lantern lights, the birds fluttered around them in a vain search for perches until they fell exhausted into the sea. Hundreds of birds hung themselves against the glass panes of the lamps. The Royal Society for the Protection of Birds has therefore provided perches around the lightships, and so saved several species of birds from becoming lost to the British Isles.

## Camping In Railway Cars

Change Is Made For New Bed Rooms In England

A scheme for camping in railway coaches is the latest idea of the Inland and North Eastern Railway Company.

Orders were given for ten six-wheeled railway carriages each to be converted for the accommodation of six campers. On July 1 these campers were placed near Paris, and way-side stations on ten branch lines.

The tenants pay for each carriage is approximately \$12.50 per week during the summer months and \$10 at the beginning and end of each season. They are fitted with all necessary equipment.

Four-fifths of the candied fruit produced in Italy has been sold, and the balance is expected to be disposed of shortly.

Central China expects an early revival of the brick tea trade with Russia.

Prince George entered a monoplane for the King's Cup air race in Hatfield, England, this year.

## Protein For Pigs Essential

Tankage and Fish-Meal High Quality Supplements

If the farmers of Canada are to supply the market with high grade bacon hogs, the use of a protein supplement is a first essential along with grain feeds when skim milk or buttermilk are not available. Tankage and fish meal are high quality protein supplements, the one a by-product of the packing industry and the other a waste product of the fishing industry. Protein supplements of vegetable origin, when the prices permit, may be used to replace some of the tankage or fish meal, but their use alone has not proven an satisfactory as tankage or fish meal or quantities of both.

The feeding of tankage or fish meal in proper proportions makes it possible to increase the rate of gain in spring pigs by 25 per cent and up to 50 per cent, in the case of fall pigs. Their use may also save the cost of production 10 per cent.

The various packers throughout Canada, realizing the importance of tankage as a hog feed, have agreed to make it available at the approximate cost of production. Fish meal can also be made available for the feeding through Farmers' Clubs or other local organizations.

Where farmers are in a position to obtain a mixed protein supplement or the ingredients for such, experiments indicate that the use of such a mixture in preference to plain grain feeds is advantageous. The following mixture has been used successfully at Macdonald College since 1926 as a complete replacement of milk or protein feed in the rations of all classes of swine: Tankage 400 lbs., fish meal 200 lbs., linseed meal 200 lbs., feeding stone meal 100 lbs., ground lime stone 75 lbs., sea salt 20 lbs., and Ferric Oxide 4 lbs.

The above mixture may be used satisfactorily with any of the numerous rations enumerated in Pamphlet 135, "Rations for Economical Meat Production," issued by the Dominion Department of Agriculture.

## A Resourceful Sailor

Drew Sketch On Envelope and Letter Reaches Destination

This Norwegian seaman forgot the name of a Saint John firm so he drew a map on an envelope and his letter reached its destination as quickly as if it had been addressed in the usual manner.

The sailor had left a film for development. He proceeded to Brooklyn, N.Y., before claiming the snapshots and then, unable to recall the name of the photographer, drew a diagram of the store's location.

The sketch showed the store to be opposite a certain spot on the main street of the city (King St.), and within a short distance of "park station" (in King Square). The store's location was indicated by the address was to a drug store. Market slip and a adjacent wharves were shown by a marked "waterfront."

## Colorado's Moving Mountain

Officials Trying To Discover Why It Is Restless

The United States government recently set out to solve the mystery of "Carbon Mountain," southwestern Colorado's moving peak. J. W. Vanderwilt of the U.S. geological survey is in charge of an investigation to determine why Carbon Mountain, until last December, a perfectly normal mountain peak, suddenly became restless and began to wander about.

Hundreds of thousands of tons of material have moved down the southeastern slope of the peak and strange underground rumblings have been frequent.

## Lemonade Is New Hybrid

Plant breeders of the United States Department of Agriculture who have been trying for years to produce a new lemon adapted to Florida conditions have succeeded in crossing lemons with limes, producing a hybrid known as a lemonlime. This hybrid bore a crop of fruit last season and it seems to be the answer to the problem. It resembles a lemon in size and shape, and also has the flavor and aroma of a lemon.

Life is made up mainly of hoping the things you want to happen will and the things you don't want.

More than 6,500,000 acres in Europe have been planted to sugar beets this year.

Business failures in Italy are decreasing.

## Canadian Wool

Substantial Advances On London Wool Exchange Over May

Canadian wool is selling on the London wool exchange at a 20 per cent advance in price over that of the May 1st.

Saskatchewan wool is being graded on a high plane.

Western sheepmen are immediately feeling the benefit of the higher prices at London.

W. W. Thompson, of the Canadian Co-operative Wool Growers, received a high rating for the advance of the July 4 wool sales at London were 20 per cent. higher than during the sales of May.

This means that Canadian wool producers are immediately affected by the price, to their advantage," he told The Leader-Post, Regina.

These wool prices are far from Merinos and cross-breds, the two classes from which most of western Canadian wool comes.

Two things control wool prices, Mr. Thompson said, rate of exchange and the London market. At the present time the wool price is at an advantage for Saskatchewan wool growers.

Reports of grading of shipments of 19,750 pounds of wool sent from Regina on June 19 to the central grading house of the co-operative at Weston, Ontario, were received by Mr. Thompson.

Of the total shipment of 19,750 pounds, made up of 36 individual shipments, 11,558 pounds were classed as range type bright, first class quality; 5,429 pounds domestic type bright, the highest quality in the domestic type; and 2,763 pounds domestic type, sent bright. There was no dark wool in the entire shipment and only 157 pounds were rejected.

Mr. Thompson said that the wool of this season is much cleaner than usual and of excellent quality," said Mr. Thompson.

## Prisoner Won Out

Staged Hunger Strike Until His Guard Was Returned

John Semay took a leaf from Gandhi's book and got what he wanted.

Semay has been confined for a year in the detention shed at immigration headquarters in Halifax. He was taken from Edmonton last year along with nine others arrested for Communist activities. His companions were deported to their homelands.

But Semay was, literally, a man without a country. He was born in western Ukraine, at the time a province of Czarist Russia. Poland took over the territory after the Great War. And when Semay tried to get back to Poland, he was refused entry. So he stayed alone in the detention shed. A Mountie was assigned to guard him and he spent long hours talking, playing cards, occasionally taking a stroll through the freight sheds that adjoin the detention cells.

When Semay's guards were changed, he decided to stage a hunger strike. It began to get on his nerves. He wanted the guard back. When his request was refused, he decided to try Gandhi's favorite method of getting what he wants. He went on a hunger strike.

He stuck to a water diet for several days. Finally they brought back the guard; and now Semay is satisfied.

## Provided Big Thrill

Three Escape Speedster Motor-Cycle By Split Second

In an attempt on the world's motor-cycle speed record Joe Wright gave a man, two boys and a crowd of 10,000 people the biggest thrill of their lives at Southport.

As he was hurtling down the straight on the sands at about 125 miles an hour a man followed by two boys walked across his path. Spectators frantically blew their whistles and the careless trio wobbled to the fact that sudden death was approaching them at the rate of 60 yards a second.

They dodged it by a fraction of that brief period.

Wright's attempt on the record failed, as, after three efforts, he was forced to give up owing to the crowd surging on to the course.

## Net Price Higher

The million pounds of poultry shipped to the United Kingdom market early last winter with the assistance of the Canadian Co-operative Poultry Pool actually netted three to four cents a pound higher than the domestic price in Winnipeg or Montreal.

The number of passengers carried on London-Paris airmail is breaking records.

## FANCIFUL FABLES

## Greatly Improved Prospects For The Western Canadian Wheat Grower Are Now In Evidence

A year last year, a bull today, William Smith, wheat buyer for the Scottish Co-operative Society, presents a heartening prospect for the wheat growers of Western Canada.

He believes wheat prices will continue firm, and that there will be a good demand for Canadian wheat this fall. While the export market is sluggish because of a speculative flurry in the United States and Canada, which has sent North American prices out of line with the world price, the Liverpool price has been climbing steadily and there is a good potential demand.

Importers and millers have been following a hand-to-mouth policy; the quality of the Argentine crop is poor; little Australian wheat is available—all of which indicates a healthy demand for the new Canadian crop.

Nearly half the rise which has occurred in Canadian wheat prices is due to changing currency values in terms of Canadian dollars. But world crop conditions have also been a considerable factor in the bulge. If exporters have taken undue advantage of these basic factors and have pushed the price out of touch with demand, the margin is not great but that it will correct itself with comparative little loss.

Evidently there is a real prospect that the Western Canadian wheat grower will be able to dispose of his crop somewhere around present, or better, levels. The Western Canadian wheat grower in Western Canada, better business throughout the Dominion.

The 1923 crop is being produced at the lowest costs ever achieved in this country. Eighty-cent wheat means a fair margin profit on the year's operations for Western farmers. It means that they will have money to spend for clothes, machinery, building supplies, the thousands and more articles which are normally in demand, some of which the farmers have been going without for a year or two because they were compelled to make the old ones do.

Every dollar of new wealth that will be brought to the farmers of the West by profitable wheat prices will mean at least five dollars in distributed purchasing power. The consistent improvement in business conditions in the prairie provinces which has been under way during the past two months will work its way rapidly through the whole of Canada. The crop brings to come on the market. The worst of the economic storm is over for the Dominion. The sun has begun to shine again. Business is picking up, and enterprise is sticking its head out of the storm collar. — Winnipeg Tribune.

### One Motive For Gift

Lindbergh Did Not Want Home Exploited As Show Place

It is entirely characteristic of Colonel and Mrs. Charles Lindbergh that they should turn over, as an act of devotion to child welfare, their former home near Hopewell, New Jersey, the scene of so shocking a tragedy concerning a little child. We can conceive of nothing more fitting nor more filled with a tender and imaginative justice. But it is a horrible comment upon American life that one motive of the Lindberghs in deeding the property over to child-welfare work was to save it from various promoters who wished to buy the scene of the Lindbergh kidnapping and exploit it as a roadside. In all the stories of crime, there have been few which have laid bare so many sordid motives as has this one.—New York Evening Post.

### Singing Thought In Camps

In the belief that singing is of equal importance in camp life with athletic, officials of the Montreal Young Men's Christian Association summer camp are concentrating on the gentle art of voice production this summer. Special attention is given the older songs, while the campers are made familiar with the conditions under which the songs were written and their historical background.

### Holiday Toll Heavy

Lives of 144 men, women and children paid for the celebration in the United States of the 157th anniversary of the republic. The toll was counted for 62 deaths, 46 persons drowned, 83 died as a result of fire works, and 59 were killed from other accidental causes.

W. N. U. 2063

### Situation Was Reversed

Minister Forgot Wedding and Substituted Hat To Offend

There are various stories of how the bride or bridegroom has been left waiting at the altar, but now there is a story of the minister forgetting and letting the couple wait.

Rev. Richard L. Ownby, pastor of Trinity Methodist Church, went to marry Miss Virginia Haak, of Memphis, to Dixon Carter, Pensacola, Fla. So the guests, the bridegroom and the bride-to-be waited at the church.

Finally, Dr. George Beik, pastor of Evergreen Presbyterian Church, was reached, and he performed the ceremony, and the couple left on their delayed honeymoon.

### Experiment Not New

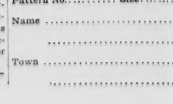

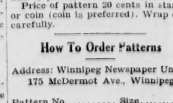

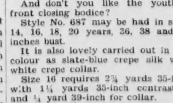

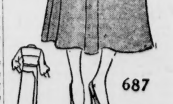

Hypnotism For Youth Extraction Used 40 Years Ago

Recent reports about a Pittsburgh dentist who hypnotizes patients before pulling their teeth brought from Rev. C. W. Hidden of Middleboro, Mass., the claim that he had participated in similar experiments 40 years ago.

He produced a clipping from the Newburyport, Mass., Herald in 1887 telling of an operation in which he hypnotized a woman patient, before she was treated by Dr. J. M. Brown. The dentist at the time pronounced the experiment a complete success.

By Ruth Rogers

### New Device Valuable

Photographic Appliance Is Of Good Service In Court Trials

Accurate details of scenes of accidents or crimes are claimed to be obtained from use of a new Swiss photographic appliance, according to a report from Consul George R. Little at Zurich.

The process is an elaboration and extension of the system of mapping and making topographical surveys by terrestrial and aerial photography. The system provides a stereoscopic view of the objects from which the plot or diagram is automatically secured. It is claimed that the results are accurate to within one-half inch in the usual street measurements.

The new device is designed only to simplify the procedure of accurately portraying the position, relation and dimensions of vehicles and other objects and highways.

By having the apparatus available at a few central stations it can be rushed to the scene and the photograph completed in a few minutes. The equipment is now in use in Zurich and is reported to be giving satisfaction.

It is claimed that necessary exposures may be made in five minutes, that frequent personal errors are eliminated and that permanent records may be made available.

### Treadmill Dog Likes Job

Setts Record In Fatigue Experiment At Laboratory

Forty miles of running in six hours, with just one short halt for a drink of water, is a record set up by "Joe," a mongrel dog of large proportions, used in fatigue experiments at the Harvard University Business School Laboratory.

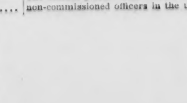

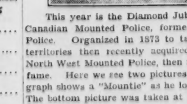

And the peculiar part is that "Joe" loves his job. His job is running on an electrically driven treadmill while scientists study his food consumption, blood circulation, temperature, etc.

The second Joe is released from cage, he emits loud "woof" and makes a dash for the treadmill and keeps right on barking until someone turns on the current. Joe can run for hours without getting tired.

The scientific tests are made to determine the organic changes resulting in the body from fatigue and to learn the extent to which fat and sugar substances are used up from exercise.

Ordinance maps of parts of England have just been found to be 40 years out of date.

### MOUNTIES' UNIFORM CHANGES IN SIXTY YEARS

### Things Are Different Now

Hotel Managers In Old Days Could Be Independent

Charles L. Wetherbee, retired proprietor of the Buckingham and Gotham hotels in New York, is dead, aged 83. Recently Mr. Wetherbee talked of the old Buckingham. "We got the cream of the trade in the old days," he said. "Those were the days you never got any more in the hotel business, when a manager could afford to be independent. If a guest asked for an extra wardrobe in his room, we seldom let him have it. On Nov. 1 we always had a long list of people waiting for suits. When I first came to the Buckingham, John D. Rockefeller was stopping here with his family. He stayed with us for several years. There was very little steam in the house, and the rooms were always heated by open fireplaces. This made a great appeal to the English trade. The building wasn't fireproof and we used to maintain an elaborate fire drill with practice once a week.—New York Times.

### Barred Debates On Railroads

Speedy Travel Was Considered Rank Infidelity In 1923

While arguments on birth control, one-piece bathing suits and redistribution of wealth hold the limelight today, way back in 1923 debates on "modern" trends were being waged.

Joshua Smith, Putnam, displays a letter in reply to some modern spirit of that date who asked for a school hall for the purpose of debating some question. "You are welcome to the use of the school to debate on proper questions," the letter says, "but such as railroads are impossibilities and rank infidelity." Further on the writer holds "If God had desired His creatures to travel at the frightful rate of 10 miles an hour He would have foretold it through His holy prophets. It's a device of Satan to lead immortal souls to doom."

### Women Opticians In England

Women opticians are appearing in England, and are said to be very successful. Because it is one of the professions which women can keep after marriage many other recruits are expected.

The only woman practicing in Putnam, Conn., is fully qualified optician and a Master of Arts of Cambridge University. Women prefer to consult a woman optician, and many men like the idea of having one gaze into their eyes.

## Much Approval Is Expressed Of Dominion-Wide Campaign To Stimulate Interest In Fish Products

### End Of Age Of Metal

Use Of Plastic Materials Is Now Increasing

"I believe," said H. V. Potter, chairman of the plastics group of the Society of Chemical Industry, in a lecture, "we are approaching the end of the age of metals; their place will be taken in industry by plastic materials. Already we have reached the stage when the strength of plastic products, weight for weight, is comparable to that of steel and iron.

Cement in itself was of little use to builders as a main structural medium until it was reinforced. By reinforcing plastic materials with fibrous matter we look forward to the day when we shall be able to produce materials not only as strong as but considerably lighter than the materials now used in industry and for domestic purposes.

"There is no reason why we should not one day be able to mount entire bodies for motor-cars of fibrous material in one piece. Yachts also would lend themselves to such a process of production. By this means in years to come it may be possible to produce a perfect steam-tight hull of a racing yacht, with a finish such as we now see in mahogany, but which never will be achieved in wood or metal.

"I look forward to the day when 99 per cent of aircraft will be constructed of reinforced plastic materials, so that disasters such as we have seen recently of an air liner catching fire when in flight can never be repeated. For domestic purposes plastic materials are already in daily use. There are enormous possibilities, however, of expansion."—Manchester Guardian.

### Giant Clover Plant

Collected In Seattle Antishores Botanists With New Find

Smithsonian botanists recently declared themselves astonished. In their hands they held some giant clover leaves sent by J. W. Thompson, a Seattle plant collector. His had found them growing on Washington's rugged slopes. He and his never seen their like, nor had the Smithsonian men.

Each plant was nearly two feet high and bore flowers almost two inches in diameter. Most of the 200 species of clover have triple leaves, like the shamrock. These "lucky" four-leafed treasures, rare and five and seven-leaf varieties. The Thompson specimens have seven leaves, many, which grow on long, eight-inch stems.

The astonishing aspect of the giant Thompson clover is that it should have been discovered so lately in the U.S., a thoroughly botanized nation. It may be, indeed, Smithsonian Botanist Conrad Vernon Morton, "one of the last conspicuous new plants to be discovered in the U.S."

### Become Good Friends

Farmer Gets Well Acquainted With His Horses

The average farmer treats his horses with kindness, due no doubt to the fact that man and horses are usually inseparable companions all day long. Through spring plowing, hot summer and harvest time, man and horse are inseparable. They find something in common, in work like this, and it is small wonder that they really get to know each other. When "Old Dobbs" gets too old to work, he generally spends his last days in the pasture where he can roam at will.

### Quiet and Unpretentious

The Border Cities Star says: The church wedding of Barbara Hutton and Clarence Alexia Midwint, following the customary civil rites, was announced in advance, "simple, quiet and unpretentious." A choir of 30 Russian singers furnished the music, four priests of the Orthodox Church officiated at the altar, the place was jammed to the doors, 20 newspaper and movie cameras men perched on the front steps and the crowd in the street tied up traffic for an hour or more, no fuss at all.

### Winter Felt Last Money

The Royal Agents Trust Winter Fair Association of Canada operated at a loss of \$11,925 during the year ending January 31, 1932, according to City Auditor Shull. The association was in a "very poor financial position."

Joining in a letter to the Dominion Department of Fisheries, a number of fishermen in Victoria, B.C., expressed approval of the campaign of fish conservation demonstrations and lectures which the department is conducting. Naturally, they spoke of the program of fish conservation in their own city a short time ago, but they commended the campaign as a whole. Similar opinions have been expressed by other fisheries people elsewhere.

The purpose of the campaign, of course, is to increase public interest in Canadian fish foods and their use and thus to benefit the fishermen and fishing industry by widening domestic demand for these products. The demonstrations and lectures are given by Mrs. Evelyn Spence, the department's specialist in fish cookery, and in recent weeks the food covered has included a number of Prairie Province centres—Edmonton, Calgary, Lethbridge and Regina, and in Saskatchewan. As a matter of fact, the field has been very much wider than the Dominion Department's program included numerous radio talks which were heard over a wide area, and heard with interest, as was indicated by reports received by the stations.

At the request of the provincial government, a second program is now being given in that province. The first Manitoba program, given last autumn, was followed by the Manitoba provincial authorities asked for additional demonstrations and meetings. After the Manitoba schedule is completed, the program will be given in some of Western's Institutes in Ontario and later in the year, it is expected, will go to the Maritime Provinces.

Fish from all parts of the Dominion, and fish in different prepared forms, as well as the fresh and frozen product, is used in the different demonstrations. In the prairie cities, for instance, whitefish and pickerel from prairie waters, British Columbia including some Pacific salmon, and Atlantic coast filets were all cooked and served to the audience.

Similarly, in the addresses before public meetings and over the radio, Canadian fish foods generally are discussed, as well as the different products from one part of the country.

### A Valuable Shorthorn

Prize-Winning Animal Shipped From Ontario To New Zealand

An aristocrat of the Shorthorn world, Brown Dale Bull, Canadian National exhibition grand junior champion winner of many other purple ribbons, left Canada, Oct. 1, recently in a specially-fitted and disinfected car for Vancouver on the last lap of a 8,000-mile journey to New Zealand. The Shorthorn was bred by James Douglas and Sons, of Caledonia and Paris, Ont. His sire, Craggerton Huger, was one of the animals imported by the Prince of Wales for the E.P. ranch in Alberta, but was purchased by Mr. Douglas on arrival from Scotland in 1909 for Willow Bank Stock Farm here.

The junior grand champion was purchased by the Dominion Livestock Branch for a New Zealand breeder, who asked for one of the best young male Shorthorns in Canada.

### Prehistoric Discovery

Said To Constitute The Most Important And Missing Link Kind To Date

A group of noted geologists from the Orient, headed by Dr. A. W. Grabau, arrived in San Francisco en route to the International Geological Conference at Washington, D.C. Dr. Grabau announced the discovery of the most nearly perfect skull of the ancient "Peking man," which he said represented "the most important missing link discovery to date."

Dr. Grabau said the skull and several jaw and teeth were found in rock caves which contained fossils of animals of the million-years-ago period. The fossils and the skull were found up traffic for an hour or more, no fuss at all.

### Winter Felt Last Money

CHAPTER XIII.—Continued.

As he went out along the slope toward the post, he was realizing, with bitterness of heart, that his sacrifice eighteen months ago, the greatest sacrifice a man can be called upon to make, had been worse than futile. It had cost him dearly, it had brought pain to Joyce, it had brought them tonight to their hour of separation. And yet, through his bitter mood, he knew the knowledge that in his sacrifice he had not all personal desire, and had kept faith with a partner dead and had held sacred his promise to Curt Spaulding, until Elizabeth herself had made that promise impossible of fulfilment.

Again he lived over that hour when he came upon a trapper's deserted, snow-drifted hut, and found Curt there, stricken with the disease, with both lungs frozen, deserted by his treacherous Indian helper, dying as valiantly as he had lived. He felt that no man on earth could understand the emotion that racked him as he knelt beside the bunk, whispering to a partner who was going down into the dark, leaving a sister penniless, alone, in the savage North.

"Alan, she loves you," he could hear those broken whispers that presently were stilled. "If you marry my sister, Alan—! I wouldn't mind going—if I could think of you—partner and brother, too—!" And over and over again that dying whispered plea, and the ineffable peace that came when Alan made covenant. "I will, Curt. I love her, too, because she's your sister."

And now, as he thought of that lone frontier sled trip home, and as he glanced up the slope toward Curt's towering belated, his lips fashioned silently:

"I tried, Curt. You wouldn't have asked more of me than what I did. But it couldn't be, it couldn't be."

Alan, she loves you," he could hear those broken whispers that presently were stilled. "If you marry my sister, Alan—! I wouldn't mind going—if I could think of you—partner and brother, too—!" And over and over again that dying whispered plea, and the ineffable peace that came when Alan made covenant. "I will, Curt. I love her, too, because she's your sister."

from the direction of the woods edge, and as it passed her, scarcely a dozen feet away, she recognized Alan. He went on to the factor's house. She heard him knock, heard him ask for her, heard his puzzled "That's odd," when Mrs. Drummond said she'd gone for good half an hour.

By a lightning flash Joyce saw him as he started on past her. Something in his manner, in his dejected head, in his hunched gait, let her know she was aware she deliberately had gone away in these last minutes and deliberately had shunned a parting talk with him.

As Alan moved slowly past the garden, unconscious of the lightning flash, thinking only that Joyce, who had burned his picture and his gift, was now refusing a last hour with him, he heard a voice in the wintry blackness. It sounded like his name. In surprise he whirled toward the asbor of morning glories, and as he stood there, listening, he heard it again—his name—Joyce's voice, half sobbing:

"Alan! Don't go. . . . I'm—I'm here. . . ."

CHAPTER XIV.

**The North's Call**

As she worked on a report that evening in the little library nook, Joyce would pause now and then and listen intently, with her dark eyes peering into the blackness outside the window.

There was time for Alan to be returning with Bill and Fred from a patrol down the Mackenzie. In the sharp vigorous gusts of October wind she kept thinking she heard the drone of the launch. Across the room from her, on a blanket-padded couch, little Marion Montgomery had fallen asleep over a picture book, her tiny muscled arm, one arm hanging over the couch. In the deep dreamless sleep of childhood the little girl was oblivious of the threat and snarl of autumnal wind swirling around the cabin. If there was any sacrifice in having that little companion in her home, Joyce had not yet become aware of it.

The report she was working on was a statement to her former business chief in Ottawa of the money expended in her work among the Indian women around Endurance.

During a lull in the wind she suddenly heard the unmistakable sound of the big police boat skimming up the wave-tossed Mackenzie. Putting aside her report, Joyce ceased being Deputy Indian Agent at Fort Kennerly, N. W. T., and became the wife of Inspector Baker, officer commanding there. With a glance at the sleeping girl she flung a cape about her shoulders and went out the cabin and down the dark winding terrace toward the wharf.

When the yellow eye of the launch drew near, Joyce saw a tall figure step upon the platform and stand ready with the painter chain. When he jumped out upon the plank, jerked the launch alongside and leaped to the ground a head, he turned to her, hat in hand, reproaching her:

"Girl, girl, you shouldn't have come down here, in this raw wet wind. You've got to begin learning to be careful!"

Rebelling snapped off the launch scorching; and as the two men began gathering their packs together, in the mantling darkness Joyce noticed Alan's approach, rising on tiptoe, oblivious of his wet slippers and the cold steel of his gun buckle.

After supper, when Alan had made himself regimental again after his six-day hard patrol, he stepped out into the living room where Joyce was finishing her report.

She beckoned him over to her, holding out several letters which had come for him on the Chipewyan mail. He did not open them; but now when she was alone in a chair beside her, she read them with him.

Buzzard had dashed off a page from his apartment address in Winnipeg. He had "done" a couple dozen fairs and pumpkin shows in his new Newfoundland, but had found that line too tame. Right now he was fighting the Winnipeg-Edmonton lap of the Air Mail. Next spring he was going to bomb the "smoke hawk" division of the Manitoba Fire Prevention, with a circus of ten scouting planes under his command.

Some time this winter the g-artist, we might put skis on the crate and hop down north to visit you. But Alan, you find out first if you have a job. Right now he was fighting the Winnipeg-Edmonton lap of the Air Mail. Next spring he was going to bomb the "smoke hawk" division of the Manitoba Fire Prevention, with a circus of ten scouting planes under his command.

"Did you notice the 'wee' Alan?" He said he had a postscript. She was just a mere afterthought. Who is she?"

"Louise of Kaniopsis, is all I know," Alan answered.

## RAILS USED AS MEDIUM

**Conductor Can Converse With Other Trainmen Ahead Or Behind**

The conductor in the caboose of a long freight train can now carry on a conversation with the engineer in the locomotive cab, or he can converse with those in charge of trains immediately ahead or behind his train, on the same track by means of a new type of communication system developed by engineers of the General Electric Company.

"This new means of communication is not radio, carrier current or direct telephone principle," says an announcement by the company. "Earphones are not required; with five watts or less put into the conductor coils, loud-speaker reception of ample volume to overcome train noises is received over a rail distance of five miles or more."

"The rails are used as the medium for the transmission and pick-up of signals, which are put into and taken out of the rails by inductor coils suspended from the caboose and locomotive at minimum clearance distance above the rails. These inductor coils are directly connected to the transmitting and receiving equipments."

**Lesson For Canadian Soldiers**

**Learned Necessity Of "Mopping Up" At Battle of Givochy**

The battle of Givochy, when Canadians displayed great ingenuity by bringing up to the front lines two pieces of field artillery, was recalled in Montreal by Sir Arthur Currie, who commanded the second Canadian brigade on that occasion. When an attacking party penetrated as far as the third enemy trench it was taken from behind by a party of the enemy who had concealed themselves in dugouts in the first trenches and had been overlooked, a fact which proved fatal to the first battalion, which was caught between two fires. It was in this battle that the Canadians learned the necessity of "mopping up," Sir Arthur, now principal of McGill University, said.

The two guns brought up into the front line did considerable damage before being disabled. Twenty of the 200 men participating in the attack were killed.

The occasion of Sir Arthur's remarks was the anniversary of the battle.

**Youth Seen In Attempt To Adjust**

With a general finality he flipped the pictures contemptuously into the fireplace.

Later, when the lights of the post were out, and the fire logs had burned to red coals and Joyce had turned her sleepy little charge away to bed, they went outside the tent.

In the night sky they heard the honking of Arctic geese, last of the migrants, winging swiftly south; and they had the faintest of the faintest woods all furry creatures were seeking out warm dens and storing food for the frozen moons. Up and down the wilderness rivers a whiff of the Strong-Woods, a whiff of land gone abroad of a mighty change brooding a whisper that drove less courageous minds into headlong flight, yet was but a challenge to those more valiant of heart.

The spirit of winter was in the air tonight; and Alan and Joyce were welcoming it. Here in the far North they had lived through other winters; they knew the savagery of those moons and their white silent beauty, too. They had work to keep them busy during the long dark, and a home against the blinding swirling blizzards, and the vista of a life together here in this far north of their choosing.

**Edna Robb Webster**

Stirred by modern youth's desperate efforts to adjust itself to the complex demands made by a rapidly changing world, Edna Robb Webster, noted serial story writer, has given her attention to the problem in her latest book, "Occasional Wife," a romance of modern marriage. The story begins in this paper on early date.

Mrs. Webster takes as her two chief characters, Camilla Hoyt, adopted daughter of a wealthy farmer, and Peter Asson, poor and struggling artist. They love each other an want to marry. Camilla, whose foster mother, wants her to marry for money, is not to share in her family's wealth when she comes of age, but it is to give to her to the country for herself as a commercial artist.

To marry Peter and saddle him with the responsibility of her support and happiness would mean, so Camilla thinks, the sacrifice of his already promising career. So she resolves a unique marriage plan.

Mrs. Webster's serial stories are known wherever newspapers are printed. She has written many favorites, among them "Dad's Girl," "Jureta," and "Lipstick Girl."

## Have Universal Appetite

**Some Beets Eat Anything From Poisonous Drugs To Chocolate**

The cigarette beetle which borrows in cigarettes and prefers to holes in other kinds of products nevertheless feasts on cayenne pepper, ginger, nutmeg, rice, figs, yeast cakes and prepared fish food. The Dominion Entomological Branch is on the outlook to prevent its spread in Canada. Another beetle with a universal appetite is the drug store beetle, which makes no discrimination between poisonous or harmless drugs, its preference being for the deadly acetone and belladonna. It also borrows holes in leather and books as a sideline, attacks dried beans and peas, breakfast foods, flour, sylvan bread and chocolate, has a weakness for parsley seasoning, pepper and ginger, and is said to tackle everything except cast iron. It is also under surveillance.

MADE IN CANADA

WORLD HAPPENINGS  
BRIEFLY TOLD

Dr. E. T. Lila Burke, 58 years old, of Morrison, N.J., was the three-month winner to pass through the gates at the World's Fair, Chicago.

Great Britain's unemployment figures show 144,771 fewer unemployed on June 26 than a month before, and 300,235 fewer than a year ago at this time.

Mr. Justice William Alfred Gaffner, member of the British Columbia Court of Appeal, since it was established 24 years ago, has retired because of ill-health.

Subscriptions and collections in the Toronto diocese restoration fund for Western Canada have already reached a total of \$240,061, or slightly more than 50 per cent. of the whole three-year objective.

Experimenters have come within one-quarter of a degree of Centigrade of producing absolute absence of heat. They produced at the University of California, 450.3 degrees below zero Fahrenheit.

President Roosevelt has assigned two college professors—James H. Rogers of Yale, and George Warren of Cornell—to make a special study of United States government financing and balancing of the budget.

Governments of the United States and Canada have been given an interim report from the commissioners set up to arbitrate the Tinian case, and the next scene in the proceedings will probably be held in Washington.

The Communist party has taken vigorous steps to bolster up Soviet Russia's faltering railway transport system, ordering immediate creation of "transport political sections" to strengthen labor discipline and ward off hostile elements throughout the entire organization.

Future of the empire marketing board, the organization formed to stimulate sale of empire products in Britain, is still undecided. J. H. Thomas, secretary for the board, indicated no agreement had been reached about dividing expenses of the board between the United Kingdom and other empire governments.

## One Way To Decide

Einstein Advances Novel Test As To His Fame In Future

Professor Einstein appears to be something of a wit for he has prearranged a way of testing his fame with posterity. He says that if, in future years, the Germans declare that he was a German, and the French say he was a Jew, then he really was a great man. But if the Germans call him a Jew and the French call him a German, then there can be no possible doubt that he was a failure. The mathematician who has outwitted and sometimes puzzled the world by his theory of relativity, is to receive an L.D. from Glasgow University shortly. He will deliver some mathematical lectures at the same time which will be open to the public.

## Useful In Many Places

Telescope In Toronto University Would Help Out

A two and a half ton glass disk has been ground for the great telescope which is to be installed at the University of Toronto. How useful that telescope would be in the front room of a Chicago flat during the World's Fair. You could see your relations from the country coming to stop at your house before they crossed the county line. There would be plenty of time to hang the sign on the front door. "Come to Europe. Will Not Return Until Christmas." Chicago Tribune.

## Stole Roosevelt's Gun

Possibly the thief who visited the North Dakota exhibit at the Century of Progress without having been charged to make a loud noise on the fourth of July. He took a revolver Theodore Roosevelt used as a young rancher at Medora, N.D. So treasured it, he was the weapon that no questions will be asked of it when it is returned.

What is believed to be the biggest snowfall in the world was witnessed in a man in New Zealand. The flower was 17½ inches across; the stalk 2½ inches in diameter and 11 feet three inches high.

"Mother, Helen is awfully lazy," "Why dear?" "I said, 'Let's play house,' and she said, 'No, let's play apartment; it's new work.'"

W. N. U. 2063

## Steamship Tonnage

Gross, Net, Deadweight and Displacement Explained In Simple Manner So the Landsman May Understand

Many people seem at a loss to know what tonnage means. The various kinds of tonnage are often a bit confusing. For the benefit of those the Canada Line has distributed the following information:

To begin with, vessel tonnage should not be confused with cargo tonnage. A cargo-weight ton is 2,240 pounds, while a cargo-measurement ton is 40 cubic feet. A vessel-measurement ton is 100 cubic feet. The carrying capacity of ships is limited by the amount of measurement space available within their holds, and by the amount of weight they can safely carry. This is called register or deadweight tonnage respectively.

The five kinds of vessel tonnage are as follows:

Gross register tonnage—The total enclosed space of a vessel, expressed in measurements of 100 cubic feet, including engine room, bunkers (fuel) spaces, crew quarters, store-room spaces, cargo spaces, etc.

Net register tonnage—The total enclosed space of a vessel available for cargo and passengers, in measurements of 100 cubic feet.

Total deadweight—The number of weight tons of 2,240 pounds, consisting of cargo, fuel, stores, supplies and fresh water for the boilers, etc., required to put a vessel down to her mark, her maximum load-line.

Deadweight cargo capacity—The number of weight tons of 2,240 pounds, which a vessel can carry as cargo after deducting the weight of fuel, stores, supplies, and fresh water.

Displacement tonnage—The equivalent weight of the water displaced by a vessel fully loaded and ready for sea. It is the largest tonnage dimension of a ship, but is not commercially important.

## Helped Oil Lamp Industry

Depression Has Increased Working Forces In Glass Factories

Because it or not, but took the depression to bring a dying industry back on its feet and start paying dividends.

Increased demand for oil lamp chimneys and lantern glasses since hard times had been felt, resulted in the doubling of working forces of a glass company in Fort Smith, Arkansas.

and huge increases in others. Glass products have been shipping since the "horse and buggy era."

An officer of one of the companies said the oil lamps are cheaper to operate than electric or gas lights. He also asserted the "back to the farm" movement had contributed to prosperity in the industry.

## Canada's Farm Wealth

Gross agricultural wealth of Canada in 1932 is estimated approximately at \$5,000,000,000. The two provinces which go over the billion dollar mark are Ontario and Saskatchewan, the former with \$1,366,725,000 and the latter \$1,143,669,000.

The number of illiterates in the United States is 4,283,703. This is a drop of 33 per cent. in a decade.

## Farm Tractor With Air Balloons Makes New Record

Makes New Record

Enthusiasm of farmers for pneumatic tire tractors is making tractor manufacturers seek higher speeds to make the tractor more valuable for hauling or travel, and for use as an all-purpose farm machine. The most interesting speed performance is the recent official AAA record of 35.4 m.p.h. for five miles made by a tractor at the Wisconsin State Fair Grounds AAA race.

Thousands of people watched Albert Schroeder, a prominent Wisconsin farmer, using a new standard

Frank Brinko, noted racing driver at wheel of tractor with which he set an official world speed record of 35.4 m.p.h. for five miles. The other belted racing driver is Chief Gardner, and beside the big tire is Bill Cummings.

for farm tractor equipped with the new Firestone Low Pressure Tractor Tire, plow several rows of the hard uneven ground inside the race track oval. Mr. Schroeder then unhooked the plow and turned the tractor over to Frank Brinko, famous race driver, who was one of the leaders in the Indianapolis lake this year. The crowds were amazed to see the tractor streak down the straight stretches—at times traveling at 30 miles an hour.

A new four-speed transmission development combined with the pneumatic tire pressure level development made possible this unheard of speed.

By Ruth Rogers

Golden Text: "Righteousness exalteth a nation: But sin maketh a people to be despised."—Proverbs 14:34.

Lesson: Isaiah 5:1-30.

Devotional Reading: Psalm 85:7-13.

Explanations and Comments

The Sin Of Greed, verses 8-10. When into the vineyard of the Lord, the prophet Isaiah, went unto those who were so anxious for the land, and there were stringent laws against the alienation of hereditary family rights see Lev. 25:33-37; De. 17:17. Every fifty years, the jubilee year, all the land that had been sold or given away were to revert to the family of the original owners. But the law was disregarded. Behind the scenes of the vineyard, the prophet Isaiah saw the nation's degradation following this. The prophet cried the wrath of God upon those who joined land to land, and upon the religious leaders who "devoted widows' houses."—John Bayne Achaan.

"In mine ears saith Jehovah of hosts," Isaiah continues. "In Hebrew to say into the ears of the people, to speak secretly and softly, but, as Genesis 23:10-26; Job 33, and other passages show, to speak in a manner that is distinct and intelligible, and to the religious leaders who 'devoted widows' houses.'"

The prophet is able to distinguish distinctly the thoughts of men of his own day from the teachings of Jehovah which rise loud within him.—"Deeds speak more loudly than words."

It is effective too in grey crinkly crepe silk with navy crepe. The jacket has the same shoulders that jut out over the arms. And note the interesting back buttoned closing of the dress.

Style No. 711 is designed in sizes 18, 18 1/2, 20 and 22 inches bust with 1 1/2, 1 3/4, 1 1/2 and 1 3/4 inches waist.

Price of pattern 25 cents in stamps or coin (cash is preferred). Wrap cut carefully.

## Fast Fur Country

Large Area In Northern Saskatchewan Profitable Field For Trappers

There are large areas in Canada in which fur is practically the only resource developed up to the present time. The country also has a large export trade in furs exceeded that of any other Canadian product, but the relative values of our exports have greatly changed since then. In 1907 fur to the value of 530,000 francs were exported chiefly to France and the West Indies. In 1908 Dominion trade tables show the value of raw furs exported to have been \$83,872. These figures increased to over \$24,000,000 in 1929. Although the value of this trade has decreased during later years, Canada may still be described as one of the great fur producing countries of the world.

One of the areas where fur is still king but which has possibilities for development along other lines is that shown on the Mudjak map sheet just published by the Topographical Survey, Department of the Interior, which covers a large area of the province of Saskatchewan. It is a price of twenty-five cents each. It covers a block of over 5,000 square miles in northern Saskatchewan, and the southern corner being nearly 200 miles almost due north of the city of Regina. The area is bounded by the Mudjak River which flows southerly across it to empty into Churchill River. The area is a very fertile one. The map was made from oblique air photographs by the Royal Canadian Air Force and is a most valuable and long-lived.

The area is a part of the Precambrian or Canadian Shield and has many of the characteristics of that region. The country is generally a rocky, the part east of Mudjak River being a part of the Canadian Shield. The map shows a very complex lake and drainage pattern in the lower center of the area, and a series of ridges underlie this part.

The area is a part of the Precambrian or Canadian Shield and has many of the characteristics of that region. The country is generally a rocky, the part east of Mudjak River being a part of the Canadian Shield. ## Something To Think About

Canadians Not Battered With Hanging Troubles Like United States

W. L. Clark, writing in Border Cities Star, says some of the banks in Maine have not responded yet. Closed for about three months the bank holiday has hit some people hard. Here is a case told about in Portland. Maine, formerly of Montreal, had a savings account in one bank. He wanted some money for a business transaction and instead of drawing his savings he borrowed from the bank and put up some Government bonds as security. Then the bank closed.

The savings account of the man is more than sufficient to cover the loan he got from the bank. But they will not pay him the amount against his loan. Instead, they are trying to sell his Government bonds to raise cash to pay the loan. The man says that they not only have gobbled up the customer's savings, they also want to swallow his Government bonds as well.

This was just one of the sad stories we heard. Another man sold a timber lot for \$30,000, put the cash in the bank one afternoon and the second day following, the bank shut down. He has not been able to touch a cent of the \$30,000 since.

Many widow, orphan, school, religious institution and other persons or organizations, who could not afford to lose, had their funds go in the cash.

All Canadians who are talking about what the banks should and should not do, are talking about things. Nothing like that has happened in Canada through the present depression.

Encouragement For Spain

Recent Flight Brought Atlantic Record For Distance and Time

In flying from Spain to the United States, a Spanish-English "Cauda Viento," Captain Barberan and Lieutenant Collar have broken the record across the Atlantic for distance and time. For the encouragement of aviation Spain needed an achievement like this. Her name, it is true, has been kept before the world by intrepid pilots like Commander Franco, who with three other army officers made a flight from Spain to America in January, 1925, and the following year flew from Spain to Brazil and Argentina, 1925 miles, in sixty hours.

Captains Loriga and Gallarza, who in 1926 accomplished the feat of taking a Spanish plane from Madrid to Manila and Captain Jimenez and Iglesias, who crossed the South Atlantic to Bahia, Brazil, 4,200 miles in forty hours less five minutes, March 29-30, 1926, were also in the world.

Spain has given to the world a great inventor in Juan de la Cierva, of whose autogiro Thomas A. Edison was the first to make a model. The question whether an airplane could be built that would take off and land in a small space, and be practically foolproof, has been answered by the "autogiro" plane has undergone improvements in England and the United States, and has been shown to the world on the Coast and back. It is still a question whether the autogiro will be able to compete with the standard airplane as a transport machine. For light commercial and pleasure flying it is coming into use.—New York Times.

Cleveland Port-Of-Call

Freighters From Holland Making Use Of Wetland Canal

Cleveland has become a port-of-call for the long-hauling freighters of one interpreting steamship line.

Through use of the Wetland Canal, the freighters, the "Havort" and the "Vastjeel," out of Rotterdam, Holland, have gained entry to the rich Great Lakes ports.

Passenger boats about 250 feet long and draw about 14 feet of water.

## PLEA MADE FOR ACTION TO AID WHEAT PRICES

London, Eng.—Prime Minister J. Ramsay MacDonald appealed to wheat producers and importers alike at a special meeting to get together in an agreement for co-operating wheat production and consumption with a view to increasing the prices of the world's principal staple commodity.

He insisted not only upon an agreement but upon a "prompt agreement."

As a consequence of the appeal the "big four" producers, Canada, the United States, Australia and Argentina, were hopeful the Dominion countries would recede somewhat from their insistence upon a large export quota and approach the \$100,000,000 figure assigned them as their share in world exports by the big four.

A French delegate proposed the negotiations be thrown into a sub-committee of the economic commission of the World Economic Conference, particularly in view of the cooperation of importing countries is concerned, but this move was rejected.

In any event the long-sought international agreement for balancing production and consumption of wheat seems likely to be the result of the fruits of the international discussions in London, an agreement of paramount interest to Canada which, in face of the dividing groups of the World Economic Conference is battling for concrete results regardless of whether these are obtained inside or outside the conference.

With the problem of cutting production to fit the demand having practically solved itself, the most western Canada turns chief attention to the plan for a quota system of exports from the chief exporters. The London discussions have embraced such a plan, the idea being to fix the exports of each leading producer not on the basis of figures of the current year but on an average of the exports over a period of three or five years.

In this connection the London negotiators read with interest the statement of George W. Robertson, secretary of the Saskatchewan Wheat Pool, this week that "it would appear a bulwage rather than an acreage basis gives itself as the most success in bringing about a better relationship between wheat production and consumption."

The French government has sought higher prices by giving wheat guarantees \$8,000,000 in advance to guarantee prices.

Farmers are asked to declare in advance their intended acreage, millers to report stocks on hand at the beginning of each season, and the wheat and the general outline to be studied under a bill just adopted by a board of farmers, dealers and a government representative with power to control the market.

### Wheat Output Reduction

Matter Discussed At U.F.A. Meeting In Edmonton

Edmonton, Alberta.—Curtailed wheat production was the main topic of discussion at the session of the U.F.A. members' annual get-together meeting in the council chamber of the parliament buildings here. The general question of crop conditions in relation to the economic situation, was also considered in a preliminary way.

The majority of the members taking part in the discussion expressed agreement with the action taken thus far in respect to reduction of wheat acreage. In view of the recent improvement in price levels, however, no decision has yet been reached as to what measures of curtailment will be necessary.

Fodder relief in the southern and eastern parts of the province will likely be needed to some extent, and was believed by members from these districts, and this will be one of the matters to be further discussed.

### Gold Production Higher

Ottawa, Ont.—An increase of more than 600 ounces was shown in production of gold in May, when 227,664 ounces were produced, as compared with 227,017 in the previous month, said a report issued by the Dominion Bureau of Statistics. Production for the first five months of this year totaled 1,196,013 ounces as compared with 1,230,294 for the same period in 1932.

W. N. U. 2093

## Pool Elevators

Saskatchewan System Shows Increased Business

Regina, Sask.—Handlings of the Saskatchewan pool elevator system showed an increase during the crop year 1932-33 over the crop year 1931-32.

The company will presently make its final payment in full to the liquidators of the Saskatchewan Co-operative Elevator Company on account of the purchase of that elevator system and also the range to the provincial government on the same account. The total amount involved is close to \$2,000,000.

These statements were made by L. C. Brouillette, president of the Saskatchewan Wheat Pool, at the Wheat Pool committee convention of contract signers of the Regina area recently.

Mr. Brouillette said further that the pool would this fall make the first payment on principal under the agreement with the government on account of the 1929 over-payment guarantee.

Operating policies for the crop year 1933-34 are to be the same as at present. The growers are to deliver to a seasonal pool or to the open market. He spoke in favor of an international export quota plan, which he said the organization now definitely favored.

He was convinced that acreage reduction by legislation was impracticable. He stressed the value of a grain reserve carried on farms, which would be the essence of the grain quota scheme.

Referring to the World Economic Conference at London, Eng., he expressed the opinion that if it accomplished nothing else than to bring about some measure of understanding as far as the world wheat problem was concerned then it could be deemed a success.

## Ten Ships Still Unsalvaged

No More Vessels To Be Raised From Scapa Flow

London, Eng.—The last of the German warships to be raised from Scapa Flow, the battleship "Von der Tann," has been taken to Rosyth to be broken up. This ends the greatest feat of salvage ever undertaken.

It was on June 19, 1919, that the German high sea fleet was scuttled. Eleven battleships, 13 cruisers and 50 destroyers foundered, mostly in deep waters. Ten ships still remain under water, but it has been decided not to raise them.

## Whale Attacks Schooner

Crew Of Small Fishing Boat Had Narrow Escape

Pope's Harbor, N.S.—Captain Howe and the crew of the fishing schooner "Evelyn" made a narrow escape after a thrilling encounter with an enraged whale off the Nova Scotia coast.

The little vessel was hove to 11 miles off Pope's Harbor when a 50-foot whale attacked at night. The public use made of the existence of the powers, as distinct from the actual use of the powers themselves, has also been shown.

"The great thing I have to fear is too high a degree of speculative activity with its inevitable reaction."

## Powder Stores Robbed

Winnipeg, Man.—Believed to have been perpetrated by a gang of safe breakers, seeking material with which to crack strong boxes, City of Winnipeg's powder magazine at Stony Mountain, Man., has been broken into and a large quantity of dynamite, fuses, caps, and detonators stolen, it was disclosed Wednesday. The crime is believed to have taken place last Thursday night.

## Nurses' Convention

Paris, France.—Thirty-two nations are represented among delegates at the international congress of nurses here this week. Canada has sent 125 delegates, Africa 25 and the United Kingdom 300, but there are no nurses from Soviet Russia. Altogether, 2,000 nurses are attending.

## Nova Scotia Election

Halifax, N.S.—Nova Scotia's provincial general election will be held on Tuesday, August 22. Premier Gordon S. Harrington announced last Wednesday night, with the approval of the lieutenant-governor. The provincial general assembly will be dissolved Thursday, and writs issued for the election. Nomination day is Aug. 16.

## Canadians Welcomed

Rudyard Kipling Addresses Touring Authors' Association

London, Eng.—Canada, her glorious past and her wonderful future, the great inheritance she has bequeathed to the mother country, formed the theme of a vividly-phrased address by Rudyard Kipling when he made one of his few public speeches to welcome the touring party of the Canadian Authors' Association.

G. K. Chesterton was another celebrated speaker at the luncheon tendered the visiting Canadian writers by the Royal Society of Literature. The Marquis of Crewe presided and many notable Englishmen were present.

## On a Holiday

Mrs. Roosevelt Visits Quebec City On Motor Tour

Quebec, Que.—Mrs. Franklin D. Roosevelt, wife of the president of the United States, who drove her own roadster into Quebec, after traveling several of her own United States gave a few minutes to reporters in her sitting-room in a hotel here.

"I am on a holiday," the first lady of the United States said, "and that means I have no definite plans." Before returning to Washington at the end of a fortnight, Mrs. Roosevelt said she intended going to her cottage at Campello, N.B.

## Inaccurate Statements

Reveals Report That Roosevelt Wrecked Conference

Plymouth, England.—Laurence A. Steinhardt, United States Minister to Sweden, on his arrival aboard the "Le De France" described as inaccurate statements he was carrying new instructions from President Roosevelt to the American delegation to the world economic conference. Mr. Steinhardt said he would spend a week in London before leaving for Stockholm.

"I think it is grossly unfair and inaccurate to say President Roosevelt wrecked the conference," the minister said.

## SIR JOSIAH STAMP APPROVES U. S. RECOVERY PLAN

New York.—Sir Josiah Stamp, British financier and economist, approved President Roosevelt's recovery programme in an address from London.

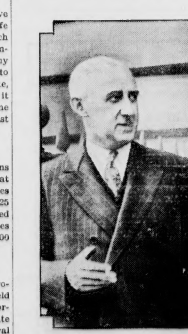

"I am one of those who think that the president's policy is to a large extent indeed right because all regular expedients have failed," said the text of his speech as made available here.

"Although I do not think that the control of industry can ever have more than a limited success at best and may create great insecurity at its worst, people on this side do not realize the depths of the difficulties into which the United States' price-level collapse and banking collapse have brought her industrial activities and how necessary it was for such striking measures to be put forward."

"I would also say that so far the public use made of the existence of the powers, as distinct from the actual use of the powers themselves, has also been shown."

"The great thing I have to fear is too high a degree of speculative activity with its inevitable reaction."

## "BRAIN TRUST" HEAD IN LONDON

Assistant Secretary of State Raymond Moley (left), confidential adviser to President Roosevelt, pictured with Herbert B. Swope, outside the conference hall in London, where the economic parleys are being held. Moley is acting as liaison between the President and the American delegation to the Conference.

## NEW MINISTER

Abducted Millionaire Is Released By Captors

La Grange, Ill.—John Factor, millionaire machine planter, held prisoner 12 days by kidnappers, was released here Wednesday night after payment by his friends of ransom estimated at \$200,000.

He walked into the La Grange police station and reported that he had been freed by his captors a short distance away and instructed how to reach the place by street car.

He was held by the officials pending arrival of a squad of Chicago detectives and federal agents.

Factor, according to the sergeant, appeared little the worse for his experience. He was clean shaven and neatly attired.

He asked for the use of a telephone to get in touch with members of his family who had kept vigil at a Morris hotel headquarters since the kidnapping.

Sir Eric Drummond, British Secretary-General to the League of Nations since its inception, has been appointed British Minister to Rome. Sir Eric Drummond resigned from the League post recently.

## Usefulness Has Been Proved

Hon. Hugh Guthrie Upholds Section 98 Of Criminal Code

Calgary, Alberta.—Section 98 of the criminal code was upheld by Hon. Hugh Guthrie, Minister of Justice, in addressing the Calgary bar association. This section of the criminal code, containing provisions for those advocating constitutional changes by violence and threats of violence, had proved useful recently, he declared.

In his brief address, the minister of justice described his duties and problems. He said the law as set forth in section 98 did not interfere with any law-abiding citizen. At the same time, he concluded, it had come in very handy in dealing with the disturbance arising out of unemployment problems.

## May Have Escaped Death

Boy Plunges Into Niagara Gorge To Escape Police

Niagara Falls, Ont.—A death defying leap into the Niagara gorge near the whirlpool was an identified 17-year-old youth after he had been handcuffed by provincial police in the act of stealing copper wire from electric light poles near the edge of the embankment. The handcuffs had just been placed on the youth's wrists when he suddenly wrenched himself loose and plunged over the bank.

Police think his fall was broken by shrubbery and that he eluded them and escaped.

## Dogs Travel By Plane

Calgary, Alta.—B. Carter and Dr. G. L. Krohn, both of Assiniboia, Sask., brought their two prize dogs to Calgary's annual canine show by aeroplane. The Boston bull and Assiniboia colts made the air trip from Assiniboia in time to enter the judging Wednesday.

## Pay Is Protested

Windsor, Ont.—Protest against what was described as employment of single men by the department of militia at various military grounds for 20 cents per day, was registered by Essex county trades and labor council. The protest will be sent in a resolution to Dominion government officials.

## Factor Is Freed

Abducted Millionaire Is Released By Captors

La Grange, Ill.—John Factor, millionaire machine planter, held prisoner 12 days by kidnappers, was released here Wednesday night after payment by his friends of ransom estimated at \$200,000.

He walked into the La Grange police station and reported that he had been freed by his captors a short distance away and instructed how to reach the place by street car.

He was held by the officials pending arrival of a squad of Chicago detectives and federal agents.

Factor, according to the sergeant, appeared little the worse for his experience. He was clean shaven and neatly attired.

He asked for the use of a telephone to get in touch with members of his family who had kept vigil at a Morris hotel headquarters since the kidnapping.

Sir Eric Drummond, British Secretary-General to the League of Nations since its inception, has been appointed British Minister to Rome. Sir Eric Drummond resigned from the League post recently.

## TRUCE EFFECTED WITH GOLD BLOC AT CONFERENCE

Hon. Hugh Guthrie Upholds Section 98 Of Criminal Code

Calgary, Alberta.—Section 98 of the criminal code was upheld by Hon. Hugh Guthrie, Minister of Justice, in addressing the Calgary bar association. This section of the criminal code, containing provisions for those advocating constitutional changes by violence and threats of violence, had proved useful recently, he declared.

In his brief address, the minister of justice described his duties and problems. He said the law as set forth in section 98 did not interfere with any law-abiding citizen. At the same time, he concluded, it had come in very handy in dealing with the disturbance arising out of unemployment problems.

"I think it is grossly unfair and inaccurate to say President Roosevelt wrecked the conference," the minister said.

## May Have Escaped Death

Boy Plunges Into Niagara Gorge To Escape Police

Niagara Falls, Ont.—A death defying leap into the Niagara gorge near the whirlpool was an identified 17-year-old youth after he had been handcuffed by provincial police in the act of stealing copper wire from electric light poles near the edge of the embankment. The handcuffs had just been placed on the youth's wrists when he suddenly wrenched himself loose and plunged over the bank.

Police think his fall was broken by shrubbery and that he eluded them and escaped.

## Dogs Travel By Plane

Calgary, Alta.—B. Carter and Dr. G. L. Krohn, both of Assiniboia, Sask., brought their two prize dogs to Calgary's annual canine show by aeroplane. The Boston bull and Assiniboia colts made the air trip from Assiniboia in time to enter the judging Wednesday.

## Pay Is Protested

Windsor, Ont.—Protest against what was described as employment of single men by the department of militia at various military grounds for 20 cents per day, was registered by Essex county trades and labor council. The protest will be sent in a resolution to Dominion government officials.

## PROGRAM FOR PRICE RAISING PUT FORWARD

London, Eng.—Some of the British Dominions were understood to be considering putting a world-wide price-raising program of wide scope and strongly want a "refractory" program even if they do not want to go so far that a collapse would be risked.

This step was revealed as the Dominions were said to be putting pressure on the British government to unhitch sterling from the French franc and follow the American dollar, moderately. The Dominions are known to strongly want a "refractory" program even if they do not want to go so far that a collapse would be risked.

Seemingly Canada is holding back from the move to set a price-raising program before the conference, a move that would include a demand for all nations to do their share to raise prices and how far they would like to raise them.

J. M. Keynes, noted British economist and cautious exponent of "managed currency," set to work with Sir Henry Strakosch of India to draw up the Dominions' ideas of what the world should do to raise prices. The two, with General Jan Smuts of South Africa, and Stanley Bruce of Australia, are to be meeting with J. H. Thomas, Secretary of State for the Dominions, to discuss the plan.

Following this meeting Keynes and Sir Henry began to draft a resolution. But Prime Minister R. B. Bennett did not attend the meeting, although he was said to be sympathetic to the idea.

The other dominion delegates, according to reports, were impossible to confirm, had stressed to Prime Minister Ramsay MacDonald and Neville Chamberlain that if the pound is kept pegged on gold, Australia, India and New Zealand might be unable to service their heavy debt burden. They were said to have argued something must be done to increase prices of the raw materials on which these countries depend for prosperity.

The pound sterling was provided the conference with a new mystery, and the empire with a new issue.

Ever since the United States dollar began its headlong downward career the British pound has remained practically stationary in terms of the French franc, the leading gold standard money.

As the franc is on gold the report has constantly run around the conference lobbies that the British equalization fund was being used to link the pound with the franc, and that in effect the pound was again on gold.

The British treasury, characteristically silent, declines to reveal how the big equalization fund is being used. It is authoritatively stated, however, the British policy on sterling is not likely to be determined until the future of President Roosevelt's program is more evident.

From the present situation it is pointed out Canada is benefitting because the depreciation of the dollar in England means the western farmer is getting more dollars for the product he sells on the British market, also the U.S. dollar's slide has narrowed the spread between the Canadian and American dollars, meaning relief to that extent on Canadian payments in the United States.

## A New Pact

Ottawa, Ont.—The Japanese beetle which, according to United States research officials will eventually spread from coast to coast, attacking crops and flowers has not yet come to Canada, agricultural officials said. Whether the Canadian winters would be any protection against the pest is therefore not known.

## Studying Wage Plan

Washington.—With the Roosevelt government considering a plan for taxation of minimum wages and maximum hours for all industries until the recovery program takes effect, new agreements by industry were submitted by Hugh S. Johnson and set down for quick hearings.

## To Attend Grain Show

Quebec, Que.—Hon. Adolphe Godbout, Quebec Minister of Agriculture, accompanied by J. A. Grenier, deputy minister, and Paul Methy, chief of the seed grain section of the department, are in Regina, to attend the World Grain Fair.

Deposits in the post office and trustee savings banks in England increased more than \$108,000,000 last year.

## Breaks Free Fall Parachute Record

Roy Lohmeim, Lethbridge, broke the Alberta record for a free fall from a plane Friday night when he fell 2,500 feet before his parachute expanded.

Twice before Lohmeim has attempted to break the record formerly held by Frank Haddock, at 1,900 feet, but each time was unsuccessful. It was while endeavouring to make a triple jump at the airport Friday evening before a large crowd of spectators that he unwittingly succeeded.

Lohmeim left the plane piloted by Ernie Boffa at 5,300 feet. He intended to open one chute, set it free, drop a few hundred feet before cutting the other away, and descend finally on the last.

The first chute cleared at about 3,000, but when the jumper tried to release the second the third chute twisted about his body and hampered him and he was unable to release it, with the result that he fell 2,500 feet before he could set the second one free. And then, as he explained, there was no time to think about the other.—Calgary Herald.

The O.E.S. are holding a picnic at the Bar U picnic grounds Wednesday afternoon July 26. All Stars, Masons and families are invited to be present. There will be entertainment for all between the ages of 1 to 101.

Wheat has advanced to new price levels during the month and it is to be hoped nothing will happen to check its ascent. The weather has been doing its best of late to prevent a wheat surplus this year and would appear to be fairly successful in the effort.

A family of at least nine skunks was located on the farm of W. Sutton this week. Even the scent is disregarded by the enthusiasts who work untiringly to destroy the pests. Six of the family have been trapped and shot.

The big U.F.A. picnic at Willow Creek billed for August 2nd has been advanced to Wednesday next July 26th.

## CANADIAN PACIFIC

Effective to August 31st unless extended.—Rate on fruit and vegetables (fresh or green) from Harrop, Nelson, Procter, Sunshine Bay \$1.40 and Creston, Erickson, Lewy, McConnell, Sider, Smith Crossing and Yandell B.C., \$1.25 per 100 lbs. to Champion.
